SUMMARY

Full-stack developer with over a year in production on the internal systems of a U.S. law firm (Laravel, Livewire, React, NestJS), specialized in Authorize.Net payments, REST APIs and webhooks, and in AI agents: I deploy them and build MCP tools for internal systems. Author of mcp-phase-gate (an MCP server on npm) and of a working paper with a reproducible simulation engine.

EXPERIENCE

Law Offices of Manuel Solis · U.S. immigration law firm; distributed development team — San Luis Potosí, Mexico

Software Developer · *on the senior developers' Scrum teams since Aug 2026* — Feb 2026 – Present

- Develop and maintain three internal systems: BOS, a Laravel/Livewire ERP with 600+ active users; a Laravel + React CRM; and Novaflow, a NestJS + React task manager. I gather requirements with each department and ship changes to production.
- Built BOS's autopay module on Authorize.Net ARB: 560+ subscriptions since May 2026 (400+ active), with webhooks for charges, declines, suspensions and card updates. Exposed payments as a REST API for the client portal.
- Helped design the CRM's power dialer, integrated with Aircall.
- On Novaflow (NestJS, TypeORM, PostgreSQL), built the external API, login and API clients that its MCP server consumes; helped build its Airbyte connector to the data warehouse.
- With a teammate, deployed 40+ personal AI agents (Hermes) on Proxmox VMs, connected to Teams, Telegram and Discord and equipped with Microsoft 365, BOS and Novaflow MCP servers; built tools for the BOS MCP server.
- Shipped 14 department-specific query agents in Microsoft Teams, backed by a GBrain knowledge base.

Software Development Intern — Sep 2025 – Jan 2026

- Integrated Authorize.Net into BOS (hosted checkout and an idempotent webhook); it now handles 21,800+ charges from 7,300+ clients across 11 merchant accounts. Integrated Stripe and Authorize.Net into the CRM (2,200+ invoices collected).
- Designed BOS's webhook module for the task manager and n8n, and built SSO between the two systems.
- Built the CRM's email module and part of the scripts that migrated data from HubSpot into the new system.

Despacho Morales · Web developer: Shopify (Liquid, JS) and Make automations — Rioverde, SLP · Jun – Sep 2025

PROJECTS

mcp-phase-gate · Open-source MCP server · TypeScript, Node.js — github.com/Montse2308/mcp-phase-gate

- Makes an AI coding agent work in 5 gated phases and document each one before touching code; the server verifies every commit against git and seals its receipt. 13 tools, a web Studio (Vite + Preact) with a public demo, v4.0.0 on npm.
- 1,400+ tests (node:test plus Playwright + axe-core E2E) and 0 path escapes across 273 attack cases. CI on Linux, Windows and macOS, with npm publishing with provenance via OIDC.

Promises to Whom · Independent research · TypeScript, Astro — whykeepapromise.org

- Working paper on SSRN (DOI 10.2139/ssrn.7580218) backed by a deterministic TypeScript simulation engine archived on Zenodo (DOI 10.5281/zenodo.23222610).
- Bilingual Astro site with a custom scene engine; ~1,400 Vitest tests and page-weight budgets that fail the CI build.

Predicting the 45-credit requirement · UASLP social service · Python, scikit-learn — Aug 2024 – Feb 2025

- Compared 6 models with cross-validation (stacking: 0.99 AUC-ROC) and scaled the analysis to 15 programs and ~5,900 students, where first-semester grades were the strongest predictor.

ADAS · Job-application data analysis system · UASLP capstone — Aug 2024 – Nov 2025

- Led a team of 5 on a Laravel 11 + MySQL platform for career services, with roles, UML and NLP trend reports.

SKILLS

Programming	PHP, TypeScript, JavaScript, SQL, Python
Academic use	C (ICPC), C++, C#, Java, R, Dart/Flutter
Backend	Laravel, Livewire, NestJS, Node.js, REST APIs, webhooks, MCP (Model Context Protocol), Zod
Frontend	React, Alpine.js, Tailwind CSS, Astro, Vite, Preact, HTML, CSS
Data	MySQL/MariaDB, PostgreSQL, Eloquent, TypeORM, Airbyte, pandas, scikit-learn
Integrations	Authorize.Net, Stripe, Twilio, Aircall, HubSpot, n8n, Microsoft 365, Shopify
Testing & DevOps	Vitest, node:test, Playwright, axe-core, GitHub Actions, GitHub Pages, npm, Proxmox, Git
Languages	Spanish (native) · English (intermediate)

EDUCATION

Universidad Autónoma de San Luis Potosí (UASLP) · B.Eng. in Intelligent Systems Engineering — Aug 2021 – Dec 2025

GPA: 91.6/100 | CENEVAL Award for Excellence (EGEL national exit exam) | Professional license 15549892 | ICPC 2022 regional
